Every effort has been made to ensure that the information provided in this booklet is as accurate and complete as possible, but there are a number of factors that may give rise to variations.

The allergens section provides details of the allergens that are known to be present in our meals and also when our suppliers have advised us that an allergen may be present in an ingredient as a result of the manufacturing process. However, we produce our food in a kitchen where a wide range of allergens including nuts and peanuts are handled. Whilst every care is taken to ensure that foods are handled separately we cannot guarantee that any product is completely allergen free.

Some menu items may not be available and new products or new meal combinations may be introduced which have not been included.

If you require more information about nutritional content or allergens please ask a member of staff or refer to Wimpy head office. We would always advise that you seek guidance from your doctor or medical professional to discuss the suitability of any of our menu items in relation to specific dietary requirements.

Figures are correct at time of going to print.
